1/ La información es provisional desde 2018 e, incluso, desde años anteriores, debido a que está sujeta a frecuentes variaciones y actualizaciones de los índices de precios de consumo (IPC) y de los tipos de cambio nominales (TCN) de los países incluidos en la muestra, una de cuyas fuentes es el Boletín de Estadísticas Financieras Internacionales del Fondo Monetario Internacional. A partir de la Información Estadística Mensual (IEM) N. 1.991 se publican los índices de tipo de cambio real, efectivo y bilaterales. La metodología utilizada es la misma que consta en el Cuaderno de Trabajo N. 119: "Metodología de cálculo de los índices de tipo de cambio real del Ecuador". La nueva muestra está conformada por los 16 países que tienen mayor comercio de bienes con Ecuador, excluyendo el petróleo.

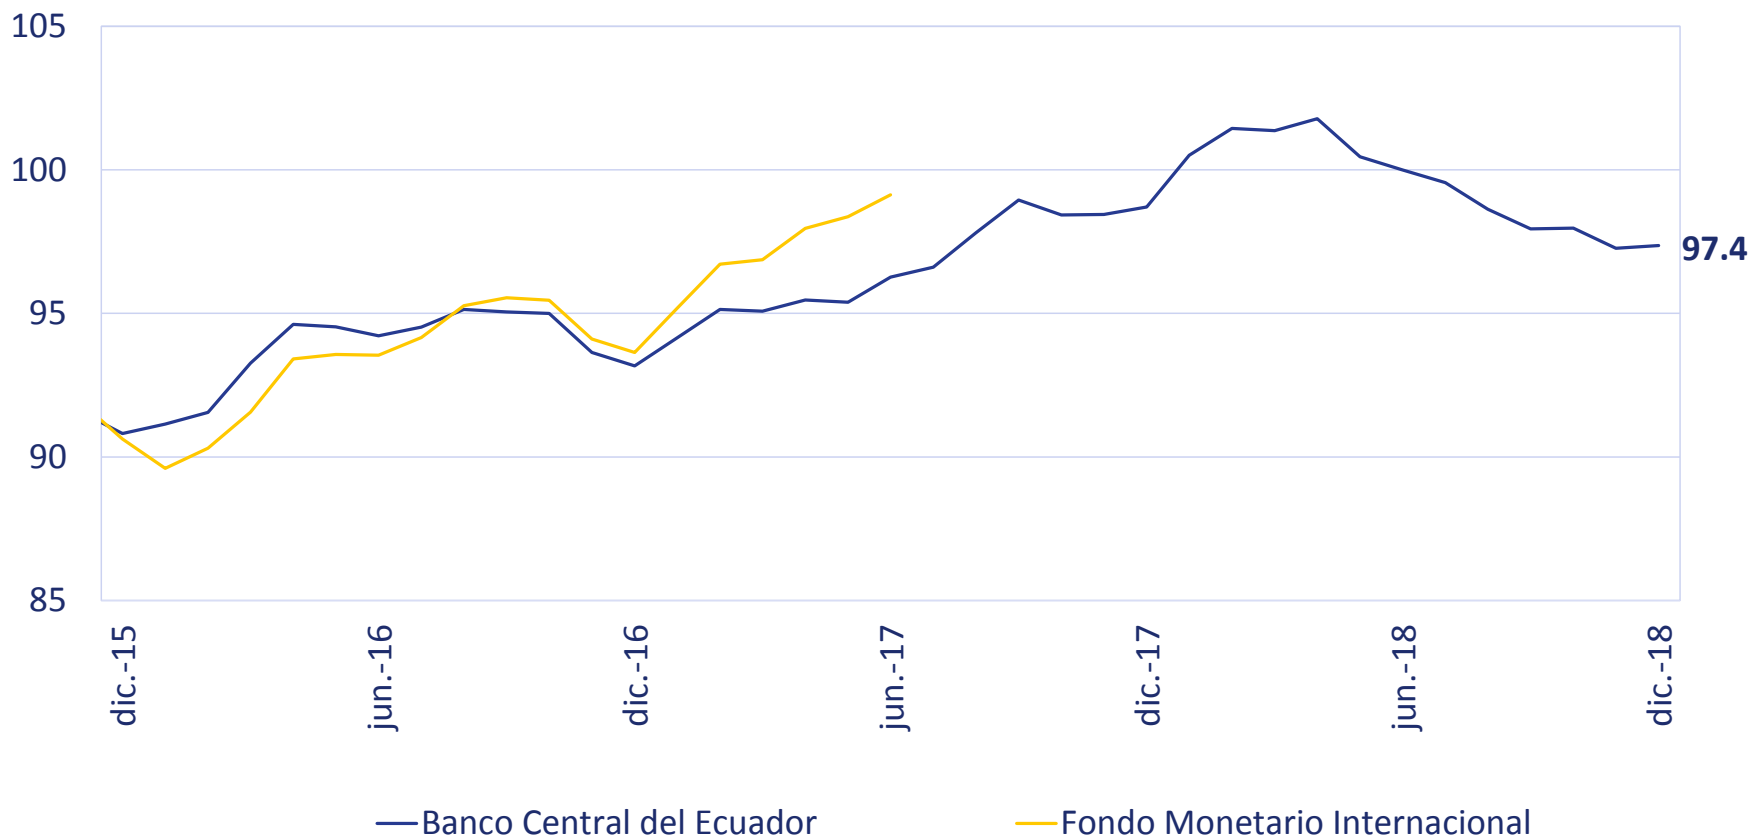

2/ Un incremento se refiere a devaluación y un descenso se refiere a revaluación.
